ABOUT ME

I am a driven and curious software developer with a bachelor's degree in Electrical Engineering from Bahir Dar University. Passionate about leveraging my technical expertise, I continuously seek to learn and apply my knowledge to solve real-world problems through innovative software solutions. My experience encompasses web development, mobile applications, and machine learning, allowing me to create impactful projects that enhance user experiences. In my free time, I enjoy playing football, which helps me stay refreshed and energized. Coming from a middle-class family, I am dedicated to improving our circumstances through my determined efforts in the tech field.

EDUCATION

Bsc in Electrical Enginnering

Bahir Dar University

2019 - 2024

CGPA - 3.79

SKILLS

WEB(Full Stack)

- Front End **: React JS**
- State Management **: Context API, Redux/Redux toolkit**
- Styling **: Tailwind CSS, MUI, Styled Components, sass**
- Back End **: Node.js/Express**
- APIs **: Rest API**
- Tools **: Git**

LANGUAGE

- English - Advanced
- Amharic- Fluent

PROFESSIONAL EXPERIENCE

Jun 2023 Sep

Inside Ethio-Telecom

Working as an intern in RAN and Optimization section wireless division

- I have gained hands-on experience in collaborating with colleagues, understanding employability, and adapting to the work environment during a four-month internship program at ethiotelecom.

Jul 2024

At Prodigy Info Tech

Working as an online intern in Web Development

- I have gained professional, international-level experience in web development by successfully delivering four distinct web applications that address industry challenges. Since that internship, I have aspired to become a developer and have actively cultivated my knowledge in the field. This hands-on experience has enabled me to enhance my skills and become a proficient web developer, capable of solving software-related issues and adding significant value in the tech field.

PROJECTS

Booking Website for a Bus Station

- For my final year project, I developed a bus station booking website as part of an embedded system that integrated both hardware and software. I took sole responsibility for the website's software development using the MERN stack, which was a pivotal moment in my journey as a developer. Despite being a beginner, my passion for coding and ability to learn quickly enabled me to successfully complete this full-stack project. This experience solidified my dedication and commitment, transforming me into a confident web developer.

eCommerce Web App for Business Purpose

- I recently developed a full-stack/MERN stack eCommerce website using the MERN stack, primarily to enhance my skills in web development. This project provided me with hands-on experience and deepened my interest in the field. By dedicating significant time to this endeavor, I was able to refine my abilities and gain valuable insights, reinforcing my commitment to continuous learning and growth.
